

Your whole business, audited in five days — *without a site visit.*

The **Preqal Risk Scan™** is a five-day quality audit delivered fully online. We study your documents, talk with your people, and measure everything against **ISO 9001** — the international standard for well-run businesses. You see exactly where you stand, and exactly what to fix first.

HOW THE WEEK RUNS

DAY 1

Opening meeting

A one-hour video call to plan the week and agree which documents we need.

DAY 2

Document review

We read everything you share and measure it against ISO 9001.

DAY 3

Staff interviews

Short calls with staff picked at random, about how work really gets done.

DAY 4

Report writing

Every finding and fix, written in plain language and ranked by importance.

DAY 5

Closing meeting

A one-hour call to present your report and hand over all five deliverables.

YOU WALK AWAY WITH FIVE THINGS

- ☒ **Organisation chart** — who does what, on one page
- ☒ **Quality policy** — written for you, or revised
- ☒ **ISO 9001 gap analysis** — where you stand, clause by clause
- ☒ **Compliance recommendations** — what to fix first, in plain language
- ☒ **Proposed document master list** — the documents your business needs

ONE FLAT FEE

GY\$100,000

flat — everything included

50% books your week

GY\$50,000 confirms your audit dates.

50% on delivery

GY\$50,000 due on Day 5, when your report is handed over.

No travel costs. No hidden extras.

Built for small and medium businesses in Guyana and the Caribbean — from a one-person operation to about fifty staff. No existing system needed: most of our clients start with nothing written down.
